

# UNDERLAYMENT SPECIALTIES

Kent Companies offers over 35 years of experience in underlayments applications across the Midwest and Southeast. We've installed over 100 million square feet of flooring underlayments. We offer design build assistance to help with the design and selection of poured underlayments, sound isolation systems and thermal mass for in-floor radiant heat systems.

**Kent Companies is a specialty subcontractor with over 35 years of experience installing underlayment and sound control products.** We help architects, engineers and general contractors with solutions for commercial, industrial and residential structures. We help our customers navigate the complex world of acoustical sound control systems. Our depth of knowledge and capacity to perform stem from our experience building many of the largest structures in the region.

## PRODUCTS

- **Gypsum underlayments:** Kent offers a full line of gypsum-based underlayments in strengths ranging from 1500 psi to 4500 psi
- **Sound control mats:** Kent offers high-performance sound control mats to mitigate airborne and impact sounds in nearly every floor assembly
- **Wear surfaces & self-leveling underlayments:** Kent installs portland-based products in strengths ranging from 3,000-7,200 psi
- **Topping for radiant heat systems:** Kent Companies works in partnership with builders and plumbers to install floor toppings over hot water radiant in-floor heating systems

## APPLICATIONS

Kent Companies specializes in floor leveling and sound control in the following applications:

- New construction
- Commercial & industrial facilities
- Renovation & historical rehabilitation
- Multifamily apartments
- Single family residences
- Hotel and lodging

## ABOUT THE FIRM

A third-generation family-owned business, Kent employs over 1,600 construction professionals across the nation. Kent Companies is known as the "Leaders in Concrete" and is consistently ranked among the top 6 largest concrete contractors in the country by ENR Magazine.
